

PowerSpeaking

VIRTUAL WORKSHOP

Virtual PowerSpeaking transforms people into confident, engaging presenters who get results.

You will connect and learn in a lively, real-time virtual environment with other participants. The interactive virtual format is ideal if you are part of a remote team or work from home.

The workshop includes an added emphasis on the skills needed to present virtually: effective voice and body language that demonstrate confidence, enliven content, and ensure audience engagement.

You will learn how to...

- Create a clear, memorable main message
- Organize an easy-to-follow, engaging presentation
- Use stories and analogies to support data
- Project confidence through effective style
- Create a development plan for improvement

The workshop includes...

- A clear, systematic presentation framework
- Intensive, interactive practice sessions
- One-on-one coaching sessions
- Supportive templates, handouts, and reference materials

What other clients have said about PowerSpeaking...

"I liked everything, including the 40-page handout, the presentation template, and critical ways to think through a presentation rather than just winging it. PLUS it was virtual. Having trainings online makes me feel more included as a Salesforce employee."

"The activities were fantastic!! Love how interactive it was!!"

"I appreciate the flexible structure that can be applied to presentations on any topic, of any length. I walked away with some tools and strategies that make the process of crafting and delivering a presentation less daunting. Also had the chance to get quick feedback from peers, which is useful."
